The Committee heard persuasive evidence about the environmental damage caused by over-abstraction. The reform of abstraction licenses must be brought forward as the Government's current plans - to reform the abstraction regime by the mid-to-late 2020s - will not take effect rapidly enough given that our rivers are already running dry. Defra must also work with Ofwat and the Environment Agency to tackle urgently those abstractions which are already causing severe damage to our rivers. It is "extremely disappointing" that the White Paper fails to set a target to increase levels of water metering. The report also highlights how bad debt in the water sector adds around £15 to each household's water bill every year. Defra must implement existing legal provisions rapidly to tackle this problem. The Committee also examines proposals to increase competition in the sector. They conclude that Defra should set a clear target date for opening a competitive retail market for water, and should take account of lessons that can be learned from Scotland. The Committee believes that the White Paper's proposals will fail to deliver a well-functioning retail market and suggests how to remedy this. The Government also needs to take action to encourage the development of Sustainable Drainage Systems (SuDS), which can reduce the risk of flooding, and to implement the relevant outstanding provisions of the Flood and Water Management Act 2010. It is "deeply worrying" that the Government had not yet reached an agreement with insurers about providing cover for homes in areas of flood risk.

Formed by Harvey S. Shipley Miller, trustee of the Judith Rothschild Foundation, and given to MoMA in 2005, The Judith Rothschild Foundation Contemporary Drawings Collection was conceived to be a broad survey of contemporary drawing practice, and it more than fulfils that goal, mixing drawings of the 1960s and 1970s with major works of the past twenty years by such artists as Kai Althoff, Robert Crumb, Peter Doig, Marcel Dzama, Mark Grotjahn, Charline von Heyl, Martin Kippenberger, Sherrie Levine, Agnes Martin, Fred Sandback, Paul Thel and Andrea Zittel, among many others. This definitive catalogue raisonné presents the collection as a whole, with an introduction by Christian Rattemeyer; five essays each focusing on a different geographic area of artistic production; images throughout; and a text on paper conservation.

Optimizing Organization Design offers a comprehensive resource and valued guide for anyone interested in improving organization performance. The book presents an approach to optimizing organization design that is based on over 100 large scale projects and 23 research studies that have been completed by Capelle Associates over the past 25 years. In addition, the book includes insightful comments from executives on their success in using this approach. Capelle’s research and client experience reveal that optimizing organization design leads to better financial performance, customer satisfaction and employee engagement. It can provide a competitive advantage and a significant return on investment. It can also become the foundation of both strategy implementation and human resources management. Capelle shows that organization design includes the alignment of a number of critical factors, including positions (vertical and functional); accountabilities and authorities (managerial and cross functional); people; deliverables and tasks. He shows that manager – direct report alignment is the single most important organization design variable. His research also shows that it is suboptimal nearly half the time. This is a horrendous waste of talent and capability, but also provides a significant opportunity for improvement in organization performance. Optimizing Organization Design clearly explains how to implement organization design improvements. This approach includes people change management, project management, and a cascading, iterative approach that is based on teams and involves education, doing real work and feedback. In addition, Optimizing Organization Design includes special sections on the role of the Board of Directors, project management, process management and compensation. In addition, the author has included four case studies and a useful glossary.
